

Helsinki Chemicals Forum –artikkelit 2009

April 6, 2009

[Financial Chronicle: Chemical exporters quiz Finnish body \(ECHA\)](#)

As all chemicals' imports into Europe have to be mandatorily registered with the European Chemicals Agency (ECHA), Indian exporters of chemicals to the continent have bombarded the agency's headquarter in Helsinki with queries. ECHA manages processes related to regulation, evaluation and authorisation of chemicals (REACH).

[Express Pharma: HCF REACHes towards successful, sustainable chemistry](#)

In many ways, Helsinki may seem to be the last place on earth to hold a conference dealing with chemicals. Traditionally a land of dense pine forests, with a lot of its green cover still intact, framed by its picturesque archipelago, Finland has successfully dealt with the Baltic Sea, reportedly the most polluted sea in the world. The Chinese pharmaceutical market seems to be putting the ignominy of having to

award capital punishment to the highest ranking official of the State Food and Drug Administration (SFDA) in July 2007 for corruption.

[LIMS/Letter: Helsinki Chemicals Forum Highlights ECHA and REACH Regulation Challenges](#)

Launching a new standard is never easy. Despite an agency's best efforts, phrases will be ambiguous and easily misinterpreted, deadlines will be difficult to meet, unforeseen obstacles will occur. This has been the case with one of the latest European Commission (EC) chemical safety regulations known as Registration, Evaluation, Authorization and Restriction of Chemicals (REACH).

[Chemical Week: ECHA Steps in to Rescue Failing Reach Data-Sharing Groups](#)

The European Chemicals Agency (ECHA; Helsinki) has launched a campaign to increase awareness among chemical firms that they must actively participate in a Substance Information Exchange Forum (SIEF) for each chemical they have pre-registered under...

June 2, 2009

[ICIS Online: ECHA submits seven chemicals to be restricted in EU](#)

The European Chemicals Agency (ECHA) has asked the European Commission to introduce strict controls for seven chemical substances considered a risk to the public, the Helsinki-based organisation said on Tuesday.

June 3, 2009

[Financial Chronicle: Tougher EU norms to hit chemicals exports](#)

Post November 2010, Indian chemical companies might face difficulties in exporting their products to countries in European Union as the European Commission (EC) has recently passed a legislation making it mandatory for companies to produce animal safety data, risk management data.

[Jornal do Brasil: Nova fronteira da regulação](#)

Ainda há poucas pesquisas sobre poluição e efeitos colaterais dos compostos em escala nano

Conhecido como o campo de pesquisa que vai impulsionar a eficiência de aparelhos eletrônicos, remédios, geradores de energia e até filtros de água, a nanotecnologia é a menina dos olhos da ciência do século 21. Mas tanto otimismo tem sido recentemente ofuscado por relatórios que advertem para a falta de regulação e de definição dos riscos dos compostos químicos em escala nanométrica. Um novo termo, nanopoluição, começa a ganhar notoriedade. E a preocupar.

June 8, 2009

[Chemistry and Industry: Act now on SIEFs, industry told](#)

The chemical industry has been warned that it needs to act now and organise substance information exchange forums (SIEFs). Geert Dancet, executive director of the European Chemical Agency (ECHA), launching the agency's SIEF awareness campaign at the Helsinki Chemical Forum, said: 'The main message is "the clock is ticking--form your SIEF now."'
